

SimpleRisk Release Notes

Version: 20260422-001

This patch release addresses CSRF security vulnerabilities in API session authentication and adds new API endpoints to the Risk Assessment Extra. It also includes a bug fix for the Incident Management Extra.

If you are not currently running SimpleRisk, please download the application and follow the installation instructions for your preferred method.

If you are running a previous release, navigate to **Configure** → **Register & Upgrade** and click **Upgrade the Application**. This process upgrades both the application and the database to the latest release.

SimpleRisk Core

Security & Authentication

- Fixed a CSRF vulnerability in API session authentication caused by incorrect initialization of CSRF protection
- Resolved CSRF token header case sensitivity in API authentication

SimpleRisk Extras

Incident Management Extra

- Fixed an issue where the success message did not appear after an incident was submitted

Risk Assessment Extra

- Added GET /assessments/questionnaire/tracking API endpoint to retrieve questionnaire tracking information
- Added GET /assessments/questionnaire/questions API endpoint to retrieve questionnaire questions
